The School Plan for Student Achievement

School: Will Rogers Learning Community

CDS Code: 19-64980-6022644

District: Santa Monica-Malibu Unified School District

Principal: Ryan Bourke

Revision Date: October 10, 2018

The School Plan for Student Achievement (SPSA) is a plan of actions to raise the academic performance of all students. California Education Code sections 41507, 41572, and 64001 and the federal Elementary and Secondary Education Act (ESEA) require each school to consolidate all school plans for programs funded through the ConApp and ESEA Program Improvement into the SPSA.

For additional information on school programs and how you may become involved locally, please contact the following person:

Contact Person: Ryan Bourke

Position: Principal

Phone Number: 310-452-2364

Address: 2401 14th St.

Santa Monica, CA 90405-2615

E-mail Address: RBourke@smmusd.org

The District Governing Board approved this revision of the SPSA on .

School Mission Statement

Will Rogers Learning Community's Vision and Mission Statements VISION

To inspire, educate, and value all learners.

MISSION

As a STEM school, we engage in inquiry-based learning that spans disciplines and is culturally responsive.

Guiding Beliefs & Principles

As a community, we:
know that all children can learn;
believe that social development is as important as academic development;
create a nurturing environment, in which students, parents, and staff members feel valued;
integrate technology and the arts to enhance learning;
design rigorous, standards-based learning experiences that meet students' diverse needs;
provide learning opportunities for students, parents, and teachers that encourage lifelong learning; and
collaborate with parents.

School Profile

As an inquiry-based STEM school with a focus on the arts, we execute our mission through an interdisciplinary approach that engages students with learning by integrating science, technology, engineering, and mathematics across the curriculum. The overarching purpose of all of our work is to provide students with opportunities to develop as thinkers, communicators, and problem solvers. To support our mission, teachers differentiate instruction and employ research-based strategies that enable all students to access rigorous curriculum. As a learning organization, we regularly engage in research-based professional development that bolsters our efforts to facilitate students' enduring learning. STEM promotes continuous improvement while providing rich opportunities for applied learning; developing the social and emotional skills of all students; and partnering with parents and guardians and community members toward improved student learning outcomes.

To support our efforts in Science, Technology, Engineering and Mathematics, we have a dedicated STEM coordinator who supports teachers in designing and delivering active, hands-on experiences across these four content areas. Teachers integrate technology into curriculum, instruction, and assessment using tools, such as whiteboards, digital document cameras, desktop and laptop computers, and iPads. We partnered with UCLA to engage teachers in job-embedded professional development in Cognitively Guided Instruction (CGI) in mathematics. CGI is built on the belief children's mathematical understanding that best occurs when they participate in activities that link new knowledge to existing knowledge. The greatest value in our STEM work comes through the exposure to real-world applications in STEM. More specifically, our engineering projects bridge content across the disciplines extending to writing and art as well. As students work as engineers, they learn about the cycle of define, design, and optimize, a process to make something functional. The engineering cycle is based on the belief that we learn through failures and partial successes. These learning opportunities are designed to help students develop the problem-solving skills, perseverance, and resilience that will prepare them for successful lives in the future.

In addition to our STEM focus, we incorporate literacy across the curriculum. Teachers use research-based strategies to reading, writing, and vocabulary. Students read a variety of genres and express themselves in writing in every subject area. Teachers regularly examine student work to analyze and support learning. Our literacy coach meets with the staff to provide high-level professional development, model lessons in classrooms, and work directly with students. As students read and write across disciplines, they develop their content knowledge, their thinking skills, and their written and verbal expression. Teachers assess students' progress in reading regularly and adjust instruction to meet student needs.

Our staff members focus their work on out TK/K-5 students' learning, well-being, social development, and safety. We have 21 classroom teachers, four special-education teachers, a school psychologist, a speech pathologist, and an occupational therapist. To support both teachers and students, we also have a STEM coach, a Literacy Coach, and a Language and Literacy Interventionist. These educators collaborate to provide a rich, quality education to children and within warm, supportive environment. Through a grant from the city of Santa Monica, we have a counselor from St. John's who provides individual and group counseling. Our talented classified staff supports students and parents in a number of settings and through systems that help them navigate the school environment. School visitors witness students who actively engage in their learning and are accountable for their work. We have high expectations for every child at Rogers, and children work hard here, but they also have fun.

Will Rogers is highly committed to a balanced visual and performing arts program for all students. All TK through fifth-grade students participate in both music and visual arts programs throughout the year. Our third- through fifth-grade students also participate in

dance.

We are a Title I school and receive additional funding that enables us to provide additional support services for children who need assistance in reaching grade-level standards. We have instructional assistants who support all grade levels in providing individualized and small group instruction in reading. Our teachers are highly qualified and committed to the collaboration they engage in with their colleagues at grade level and other school-wide meetings. They participate in ongoing professional development tied to research-based instructional practices. During our professional-development meetings, teachers have a unique opportunity to collaborate and engage in learning activities that increase their understanding and ability to teach at the highest levels.

At Will Rogers Learning Community, we believe that students' social and emotional development is just as important as their academic development. With that in mind, we became a Responsive Classroom school. The essence of Responsive Classroom is an evidence-based approach to education that focuses on the strong relationship between academic success and social-emotional learning. The Responsive Classroom approach empowers educators to create safe, joyful, and engaging learning communities where all students have a sense of belonging and feel significant.

Will Rogers is a learning community proud of its children, its diversity, and its hopes for the future.

SPSA Executive Summary with SLT Plan Narrative

Our 2018-2019 strategic focus is writing. Teachers are working together to design learning environments that enable students to produce effective writing across disciplines for a range of purposes and audiences. We know that the process of writing helps students develop critical thinking skills in all subject areas. When we require students to explain their mathematical thinking their problem solving abilities, understanding of mathematical concepts and procedures, and reasoning improves. As teachers regularly analyze student writing, with both formal and informal assessments, they discover students' learning needs and gather information to design instruction that will improve student achievement.

We use a number of formative assessments to monitor students ELA and mathematics progress throughout the year. Fastbridge, SBAC, writing rubrics, BAS informal reading inventory, math unit tests, and an ongoing focus of looking at student work as a professional learning community. Teachers meet twice a month during bank time on Friday mornings and they meet weekly, during the day or after school, depending on the grade level. All of our PLC work involves examining Common Core Standards, designing lessons to meet those standards, and developing assessments that demonstrate what students know and are able to do.

We regularly examine data to inform instruction and work as both a whole-staff professional learning community (PLC) and grade level PLCS. All grade levels engage in regular data meetings as part of their ongoing Professional Learning Community (PLC) work to examine formative assessment data to better differentiate instruction and intervention and to evaluate the effectiveness of instruction and intervention. We meet as a whole staff PLC once a month and engage in conversations about student learning across grade levels. Teachers are subbed out for half a day for data meetings. During data meetings, the Literacy Coach uses a protocol to discuss formative data, such as that from Fastbridge, BAS, writing samples, and student work. Teachers use this information to guide their instruction for the upcoming weeks. Literacy Coaches and teachers also use it to determine groups for intervention in reading and mathematics. We conduct reading intervention during the school day and a math intervention after school for students in grades 3 - 5.

Planned Improvements in Student Performance

School Goal #1

The School Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet student performance targets. As a result, it has adopted the following school goals, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

SUBJECT: Mathematics

District LCAP Goal 1:

All graduates are ready for college and careers.

Data and analysis used to form school-specific SMART goal(s)

When we analyzed the SBAC data, we noticed that students struggled in writing in both reading and mathematics. Our 2016-2017 CAASPP scores in mathematics show that 40% of students scored above standard on the communicating reasoning claim and 60% scored near standard or below. Our 2017-2018 CAASPP scores in mathematics show that 47% (3rd), 29% (4th), and 47% (5th) scored above standard on the communicating reasoning claim and 57% (3rd), 71% (4th), and 53% (5th) scored near standard or below. Writing is a high-leverage strategy that could boost achievement in all subject areas, and specific, explicit writing instruction in mathematics will help boost our overall mathematics scores. Students will demonstrate clear, evidence based writing across disciplines at a proficient level or better as measured by CAASP Writing and Communicating Reasoning scores. 55% of students (grades TK-2) will meet standards for writing on grade-level designated rubrics.

Increase the percentage of students who meet or exceed standards on the 2018-2019 CAASPP in mathematics by 5%.

Increase the percentage of students who score above standard in mathematics communicating reasoning claim by 10%.

Increase each grade level's (grades 3-5) percentage of students who score meets or exceeds on SBAC Math by 5%.

How the school will measure progress toward this goal

We will analyze SBAC Scores, formative assessments, student work, and our PLC work. We will have seven-week writing instruction cycles for narrative, informative/explanatory, and argument. We will assess writing in mathematics three times per year, including pre- and post-assessments. Each week, teachers will examine student writing in their PLCs and adjust instruction. We will conduct both formal writing assessments throughout the year.

Planned Improvements in Student Performance

School Goal #2

The School Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet student performance targets. As a result, it has adopted the following school goals, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

SUBJECT: English Language Arts

District LCAP Goal 2

English learners will become proficient in English while engaging in a rigorous, standards-aligned curriculum

Data and analysis used to form school-specific SMART goal(s)

When we analyzed the SBAC data, we noticed that students struggled in writing in both reading and mathematics. Our 2016-2017 CAASPP scores in ELA showed that 50% of students scored above standard in the writing claim. Our 2017-2018 CAASPP scores in ELA showed that 82% (3rd), 82% (4th), and 96% (5th) of students scored above standard in the writing claim. Writing involves many high-leverage strategies that serve to potentially boost achievement in all subject areas; as such, explicit ELA writing instruction could boost our overall ELA scores. Students will demonstrate clear, evidence-based writing across disciplines at a proficient level or better as measured by CAASP Writing and Communicating Reasoning scores.

Increase the percentage of students who meet or exceed standards on the 2018-2019 CAASPP in ELA by 5%.

Increase the percentage of students who score above standard in the writing claim on the 2018-2019 CAASPP by 5%.

60% of students (grades TK-2) will meet standards for writing on grade-level designated rubrics.

Increase each grade level's (grades 3-5) percentage of students whose score meets or exceeds on SBAC ELA by 5%,

How the school will measure progress toward this goal

Review of spring 2017 SBAC data, formative assessment data, learning walks, and PLC work. We will have 6-week writing instruction cycles for narrative, informative/explanatory, and argument and 5-week cycle including pre/post assessment and writing instruction during math topics. Each week, teachers will examine student writing in their PLCs and adjust instruction. We will conduct bpth formal writing assessments throughout the year.

Planned Improvements in Student Performance

School Goal #3

The School Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet student performance targets. As a result, it has adopted the following school goals, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

SUBJECT: Parent Engagement/Satisfaction

District LCAP Goal 3

All students engage in schools that are safe, well-maintained and family-friendly.

Data and analysis used to form school-specific SMART goal(s)

2016 Data shows that 84% of parents are satisfied with the quality of their children's education. We would like to increase this by at least 2% per year.

How the school will measure progress toward this goal

Continued surveys, as well as formal and informal communication with parents.

School Site Council Membership

California Education Code describes the required composition of the School Site Council (SSC). The SSC shall be composed of the principal and representatives of: teachers selected by teachers at the school; other school personnel selected by other school personnel at the school; parents of pupils attending the school selected by such parents; and, in secondary schools, pupils selected by pupils attending the school. The current make-up of the SSC is as follows:

| Name of Members | Principal | Classroom Teacher | Other School Staff | Parent or Community Member | Secondary Students |
|--------------------------------------|-----------|----------------------|-----------------------|----------------------------------|-----------------------|
| Ryan Bourke | Х | | | | |
| Sylvia Kerkotchian | | X | | | |
| Sitara Contreras | | X | | | |
| Zakiya | | | | Х | |
| Manja Lenkin | | | | Х | |
| Darcy O'Brien | | | | х | |
| Jeffery Douglas | | | | Х | |
| Charles Sullivan | | | | Х | |
| Jackie Barajas | | | | х | |
| Jeremy King | | X | | | |
| Monica Gonzalez | | X | | x | |
| Aimee Peterson | | Х | | | |
| Tristen Gartrell | | Х | | | |
| | | | Х | | |
| Numbers of members of each category: | | | | | |

At elementary schools, the school site council must be constituted to ensure parity between (a) the principal, classroom teachers, and other school personnel, and (b) parents of students attending the school or other community members. Classroom teachers must comprise a majority of persons represented under section (a). At secondary schools there must be, in addition, equal numbers of parents or other community members selected by parents, and students. Members must be selected by their peer group.

Recommendations and Assurances

The school site council (SSC) recommends this school plan and Proposed Expenditure(s)s to the district governing board for approval and assures the board of the following:

- 1. The SSC is correctly constituted and was formed in accordance with district governing board policy and state law.
- 2. The SSC reviewed its responsibilities under state law and district governing board policies, including those board policies relating to material changes in the School Plan for Student Achievement (SPSA) requiring board approval.
- 3. The SSC sought and considered all recommendations from the following groups or committees before adopting this plan (Check those that apply):

| X | English Learner Advisory Committee | |
|---|---|-----------|
| | | Signature |
| | District/School Liaison Team for schools in Program Improvement | |
| | | Signature |

- 4. The SSC reviewed the content requirements for school plans of programs included in this SPSA and believes all such content requirements have been met, including those found in district governing board policies and in the local educational agency plan.
- 5. This SPSA is based on a thorough analysis of student academic performance. The actions proposed herein form a sound, comprehensive, coordinated plan to reach stated school goals to improve student academic performance.

Conclusions based on this data:

- 1. Overall, we made significant gains between 14-15 and 15-16. Third grade students performed very well, with most students scoring in above standard. This is the first group of students who have had instruction rooted in Common Core Standards since kindergarten. Fourth grade did not make the gains that we expected/ Fifth grade advanced significantly as compared to the previous years' fourth-grade scores, as well as the previous year's fifth-grade scores.
- 2. Of the three claim areas, Reading nonfiction and literary texts was our overall lowest score at 79%. of students at or above standards.
- 3. The percentage of students in the standard not met category decreased by 10 percentage points between 14-15 and 15-16.
