

California Education Code Communicable Disease

49403.

(a) Anything to the contrary notwithstanding, the governing board of any school district shall cooperate with the local health officer in measures necessary for the prevention and control of communicable diseases in school age children. For that purpose the board may use any funds, property, and personnel of the district, and may permit any person licensed as a physician and surgeon, or any person licensed as a registered nurse acting under the direction of a supervising physician and surgeon as provided in subdivisions (b) and (c), to administer an immunizing agent to any pupil whose parents have consented in writing to the administration of such immunizing agent.

(b) A registered nurse, acting under the direction of a supervising physician and surgeon, may perform immunization techniques within the course of a school immunization program provided that the administration of an immunizing agent is upon the standing orders of a supervising physician and surgeon and in accordance with such written regulations as the State Department of Health may adopt pursuant to Section 303.5 of the Health and Safety Code.

"Supervising physician and surgeon," as used herein, means the physician and surgeon of the local health department or the physician and surgeon of the school district that is directing the school immunization program.

(c) While nothing in this section shall be construed to require the physical presence of the supervising physician and surgeon, the supervising physician and surgeon under whose direction the registered nurse is acting shall require such nurse to:

(1) Satisfactorily demonstrate competence in the administration of immunizing agents, including knowledge of all indications and contraindications for the administration of such agents, and in the recognition and treatment of any emergency reactions to such agents which constitute a danger to the health or life of the person receiving the immunization; and

(2) Possess such medications and equipment as required, in the medical judgment of the supervising physician and surgeon, to treat any emergency conditions and reactions caused by the immunizing agents and which constitute a danger to the health or life of the person receiving the immunization, and to demonstrate the ability to administer such medications and to utilize such equipment as necessary.

California Health and Safety Codes SECTIONS 120175 and 120250120175.

Each health officer knowing or having reason to believe that any case of the diseases made reportable by regulation of the department, or any other contagious, infectious or communicable disease exists, or has recently existed, within the territory under his or her jurisdiction, shall take measures as may be necessary to prevent the spread of the disease or occurrence of additional cases.

120250.

All physicians, nurses, clergymen, attendants, owners, proprietors, managers, employees, and persons living with, or visiting any sick person, in any hotel, lodging house, house, building, office, structure, or other place where any person is ill of any infectious, contagious, or communicable disease, shall promptly report that fact to the health officer, together with the name of the person, if known, the place where he or she is confined, and the nature of the disease, if known.
