**ADDENDUM**

DISCUSSION ITEM NO. D.03

Last year, the Educational Services Department provided the Board of Education with a discussion item related to an analysis of mathematics achievement data. Educational Services team members suggested a framework for the district's on-going work to improve mathematics instruction. That discussion closed with some proposed next steps as well as some questions for reflection.

In this presentation, staff will:

- Revisit the work completed over the past year
- Briefly review achievement data
- Discuss current work in course alignment, student placement, and the need for differentiated instruction in mathematics

Finally, staff will present the three-year plan for professional development and for building instructional leadership around mathematics instruction.

COMMENT: This item was postponed from the March 13, 2008, meeting.
