

**Santa Monica-Malibu Unified School District
Board of Education Meeting
MINUTES**

June 9, 2008

The Santa Monica-Malibu Unified School District Board of Education and the Measure “BB” Advisory Committee held a workshop on Monday, June 9, 2008, in the District Administrative Offices: 1651 16th Street, Santa Monica, CA. The Board of Education called the meeting to order at 4:20 p.m. in the Board Room at the District Offices.

I CALL TO ORDER

A. Roll Call – Board of Education

Oscar de la Torre – *arrived at 4:28pm*

Jose Escarcé

Maria Leon-Vazquez

Ralph Mechur

Kelly Pye

Barry Snell

Kathy Wisnicki – *left at 7:00pm*

B. Pledge of Allegiance

Led by Ms. Pye.

II CONSENT CALENDAR

A.01 Overnight Fieldtrips1

III Informational Workshop – Measure “BB” Program Workshop

The Board of Education and the Measure “BB” Advisory Committee will hear an update from the architectural firms that have been hired to implement the Measure “BB” construction projects at each SMMUSD site. The workshop will include an overview of the proposed district standards, presentations from each of the six architectural firms, and next steps. The presentations will address the site engagement processes, a description of the project scopes, the schematic designs, and cost estimates.

The firms that have been hired for the Measure “BB” projects are R. L. Binder, Daly Genik/IBI, Harley Ellis Devereaux, HMC Architects, Osborn/Koning Eizenberg Architecture, and WWCOT. A representative team from each firm will present to the Board of Education.

***** ***** ***** ***** ***** *****

CFO Jan Maez thanked the Site Governance Committees, the Measure “BB” Advisory Committee, Parsons, the architectural firms, the Board of Education, and district staff for their dedication to the construction programs. Craig Hamilton, Co-Chair of the Measure “BB” Advisory Committee, thanked Ms. Maez for her support of and participation in the committee. He then summarized the status of the site projects and district standards.

Each architectural firm updated the board regarding the status of the construction projects at their respective school sites. (The presentation can be found under Attachments at the end of these minutes.)

Santa Monica High School Discussion

Mr. de la Torre inquired about student safety if Michigan Ave. were to be opened through to the Civic Center. The architects said that Michigan Ave. would be gated off to traffic during school hours, but that sections of the campus could be gated off from the public entirely during non-school hours. Dr. Escarce asked if the technology and science replacement project would increase the distance students must walk from one class to another. The architects clarified that science building would be located close to where it is now, and the technology building would be its own house. Ms. Pye asked about parking. The architects said there are currently 392 parking spaces, which would remain in Phase I projects, but that Phase II would provide for 500 more parking spaces.

Edison Language Academy Discussion

The architects clarified for Dr. Escarce that preschool classrooms would be located by the playing fields. Dr. Escarce asked if the field's location away from the freeway was a result of environmental concerns. The architects said that the field's location allowed for the school to remain open during the extensive construction, but that concerns regarding air particulates from the freeway were being addressed in planning the new campus. Ms. Leon-Vazquez inquired about the interim real state and interim conversion costs. The architects explained that during construction, some parking and play area might have to be moved off-campus to rented space or city property. Dr. Wisnicki expressed her concern that the Edison project appears to be \$10 million over the original budget. The architects and staff explained that the initial Edison budget was preliminary, but that the projected \$33 million would be required for the campus to be rebuilt and meet the district standards. The architects explained for Mr. Mechur that staging costs were part of each site's budget. Mr. de la Torre asked about areas of the campus that could be used by the public as well. The architects replied that some areas of campus, such as a library/computer lab, were designed for multiple uses, including access for the public.

Olympic High School Discussion

Mr. Mechur inquired about the \$7 million estimated cost. Staff and the architects clarified that the estimate is for all the projects on the site for the Facility Master Plan, not just Phase I. The site committee and architects will continue working to select the projects with the highest priority for Phase I and bring the entire work into budget. Principal Janie Gates added that the site and architects have discussed a new library, science lab, computer lab space, PA system, P.E. facilities, and two additional classrooms for summer school at the PAL building where Adult Education was held.

Washington East/West CDS Discussion

Mr. de la Torre inquired about the projected growth of enrollment. The architects clarified that when the Pine Street preschool is removed from the Olympic site, those children would attend preschool at Washington West. The architects clarified for Ms. Pye that the Pine Street relocation was scheduled for Phase II, that Phase I provides for four classrooms at Washington West, and the final realization of the Facilities Master Plan shows a total of seven preschool classrooms at this site.

Malibu Middle/High School Discussion

The architects explained for Dr. Wisnicki that a new road would be built to the new faculty parking lot, and the geotech and civil engineering reports show that the hillside is stable. Dr. Wisnicki then inquired about drop-off/pick-up locations. The architects showed a recess along Morning View Drive where high school drop-offs/pick-ups would occur. The architects then clarified for Ms. Pye that the additional proposed reductions would bring costs down to budget.

Juan Cabrillo Elementary School Discussion

Mr. Mechur inquired about open parking areas and draining. Staff explained that storm water run-off was part of the districtwide plan. Mr. Mechur reminded everyone that while the elementary school sites have schematic drawings, they have not been allocated Measure “BB” funding. The architects explained for Ms. Pye that pick-up/drop-off locations and a safe turn around area were considered in the plan for the site.

Point Dume Marine Science School Discussion

The architects clarified for the board that replacing the natural gas lines would be a priority and would be coming forward for approval at the June 26th meeting.

Webster Elementary School Discussion

Mr. Mechur inquired about the choice for building placement. The architects explained there was alternate plan that placed the playground space further away and on other side of parking lot, which the school did not like. Mr. Mechur expressed his concern regarding fire danger for buildings close to the mountain. Dr. Escarce inquired about the \$1.4 million for the parking lot. Staff explained that parking lot renovations addressed safety priorities. Mr. de la Torre suggested a joint use opportunity with the City of Malibu to reduce cost of the parking lot. Mr. Snell asked if the district had approached the city about that. Craig Hamilton, Co-Chair of the Measure “BB” Advisory Committee said the committee had not formally weighed in on the parking lot.

Lincoln Middle School Discussion

The architects affirmed for Ms. Pye that the Lincoln budget was on target.

Franklin Elementary School Discussion

Mr. Mechur asked the architects to describe the 2030 Challenge for the audience and members of the public. The architects explained that the 2030 Challenge is a goal to have all new buildings reduce their carbon footprint to 0% by the year 2030.

McKinley Elementary School Discussion

The architects clarified for Mr. Mechur that the budget does include the Special Education classrooms. The architects explained for Mr. de la Torre that the plan is to remove the chain link fence along Santa Monica Boulevard and install a partial wall with a gate to allow the school’s historic façade to be visible.

Roosevelt

No discussion.

Data Center Discussion

No discussion.

John Adams Middle School Discussion

Ms. Leon-Vazquez inquired about the science classrooms. The architects explained that the school has expressed their satisfaction with the current science classrooms. Ms. Pye commented that she liked the idea of swapping the tennis courts and parking spaces. The architects said the idea came directly from the school staff.

Grant Elementary School Discussion

The architects commented that there would be space for family gardens.

John Muir Elementary School/SMASH Discussion

The architects gave more details regarding the green roof. Green roofs are made of real vegetation, which in this case is drought-resistant, collects rainwater, and is acts as a natural insulator for the building underneath it. Mr. de la Torre wanted staff to keep in mind how elements such as a green roof will impact the duties of classified staff. Ms. Hyatt replied that the green roof is still being researched to ensure it is as low maintenance and environmentally friendly as it claims to be.

Will Rogers Learning Community Discussion

The architects clarified for Dr. Escarce and Mr. de la Torre that the new multipurpose room, which will be 5,600 sq. ft., would host events such as science fairs and breakout activities, while the existing cafetorium would host events that require a raised stage. Dr. Escarce asked about science and technology uses for the multipurpose room. The architects said that the multipurpose room would have areas for lab work, but that the districtwide technology upgrades would address the necessary equipment. Ms. Leon-Vazquez asked if the relocatables would remain. The architects explained replied that the campus believes it can accommodate the loss of the relocatables.

General Discussion

Ms. Hyatt commented that in addition to the planned action items for the June 26th meeting, staff will also clarify and update the site budgets.

IV PUBLIC COMMENTS

Public Comments is the time when members of the audience may address the Board of Education on items not scheduled on the meeting's agenda. All speakers are limited to three (3) minutes. When there is a large number of speakers, the Board may reduce the allotted time to two (2) minutes per speaker. The Brown Act (Government Code) states that Board members may not engage in discussion of issues raised during "III, Public Comments" except to ask clarifying questions, make a brief announcement, make a brief report on his or her own activities, or to refer the matter to staff. This Public Comment section is limited to 20 minutes.

- *Stephen Saks and Elizabeth Stearns, members of the community, addressed the board regarding construction at SAMOHI.*

V ADJOURNMENT

It was moved by Mr. Snell, seconded by Ms. Pye, and voted 6/0 (Dr. Wisnicki left at 7:00pm) to adjourn the meeting at 7:48 p.m. The next regular board meeting is scheduled for **Thursday, June 26, 2008, at 5:30 p.m.** in the **District Administrative Offices: 1651 16th St., Santa Monica, CA.**

WEBSTER ELEMENTARY
SCHOOL

Original BB Scope

- New parking lot at front of school.
- Remove three relocatables
- New 4-6 classroom building.
- Investigate, septic tank/sewer capacity.
- LCP/Malibu (Coastal Commission) compliance.

BUDGET: \$2.5

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide

Current BB Scope

- New parking lot at front of school.
- Remove three relocatables
- New 3 classroom building
- Upgrade pickup/drop-off areas
- Investigate, septic tank/sewer capacity
- LCP/Malibu (Coastal Commission) compliance

BUDGET: \$2.5 M

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide

LINCOLN MIDDLE SCHOOL

LINCOLN MIDDLE SCHOOL

Original BB Scope

- Remove existing west wing including the Music and Art rooms
- New, two-story west wing including:
 - Library with community access
 - 2 Music classrooms
 - 2 Art classrooms
 - 12 standard classrooms
- Reconfigure existing Library into 2-3 new classrooms
- Reconfigure 3 existing classrooms into 2 new science labs
- New, all-weather track and synthetic turf athletic field, including restrooms and infrastructure for future scoreboards
- **Classroom net gain: +4**

Budget: \$16 Million

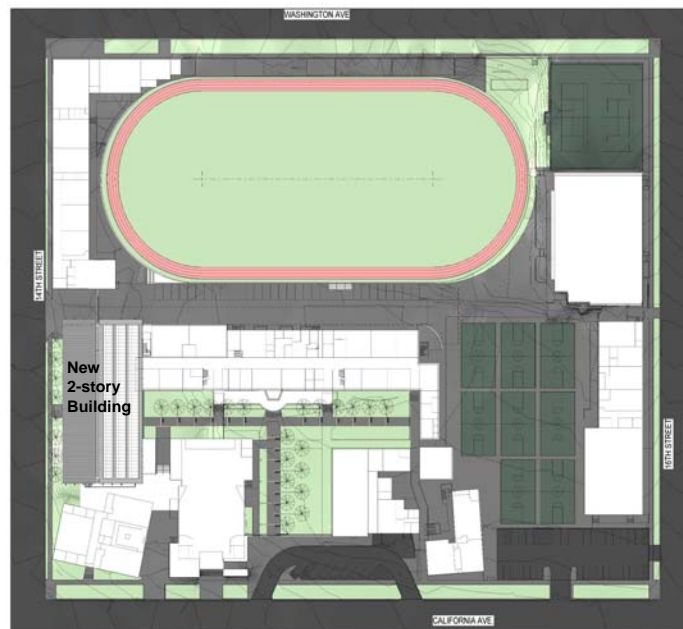

- Upgrade to the fire and life safety/fire alarms as required
- Upgrade to the technology infrastructure campus-wide

Current BB Scope

- Remove one-story building 8 classrooms on fourteenth street (Music building to remain)
- New two-story building with Library, Art classroom and 8 standard classrooms
- Renovate vacated Library into 4 classrooms
- Renovate existing 3 classrooms on the second floor of main building into 2 new science labs
- New all-weather track and synthetic turf athletic field, including restrooms
- New parking lot between the main building and the field
- **Classroom net gain: +3**

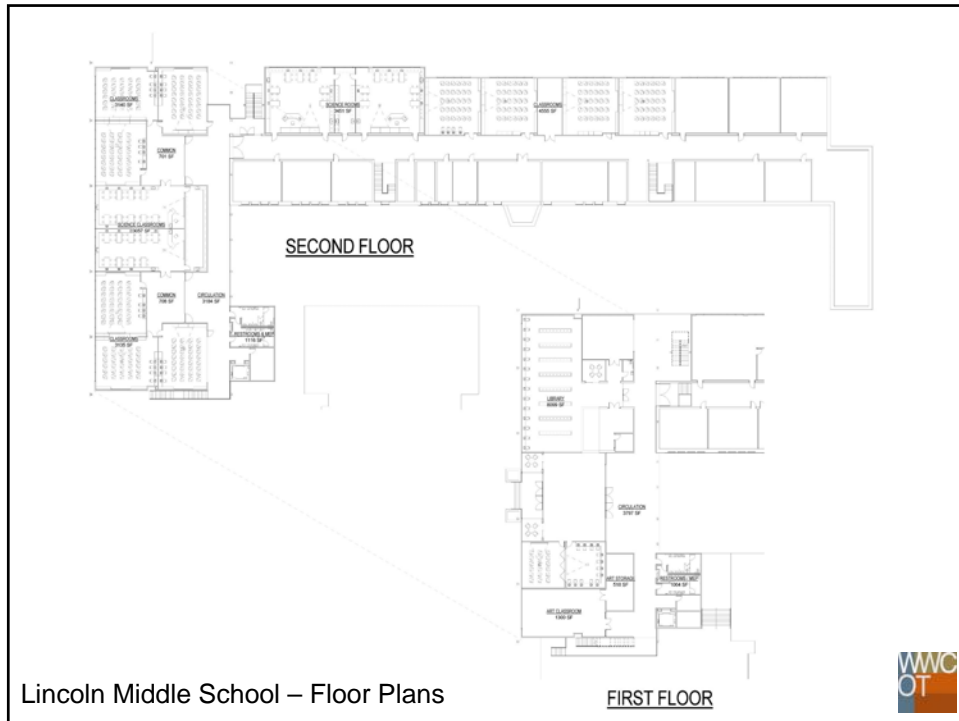

Budget: \$16 Million

- Upgrade to the fire and life safety, fire alarms as required
- Upgrade to the technology infrastructure campus-wide

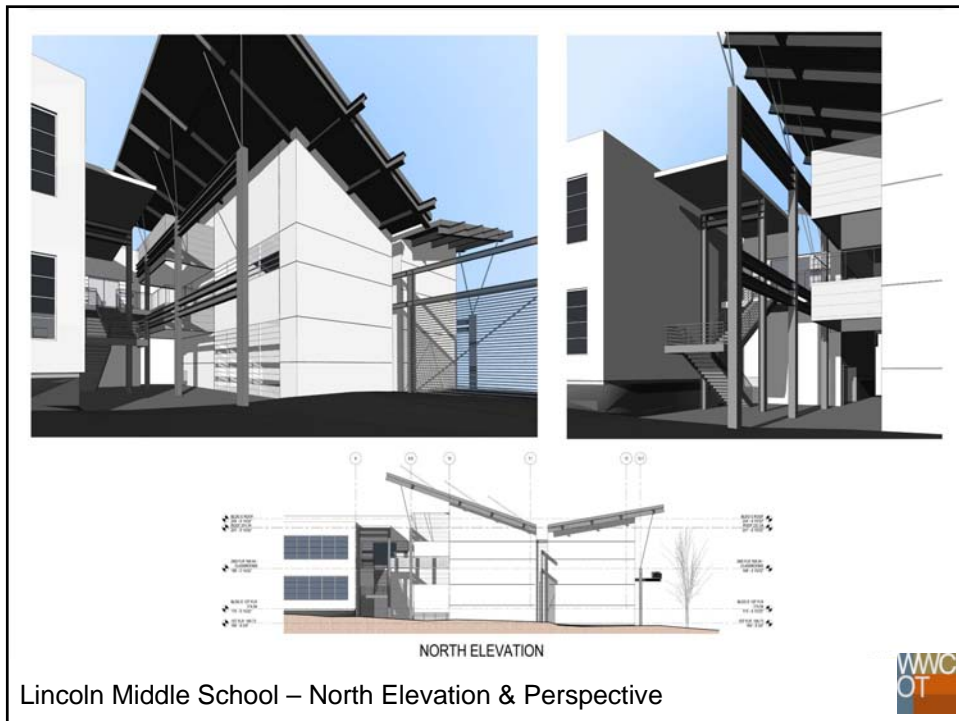

Lincoln Middle School – Site Plan

SUSTAINABLE DESIGN APPROACH

- 2030 Challenge
- Comfortable, Healthy & Responsible Environments
 - Natural Light / Optimized Daylight Control
 - Indoor Air Quality
 - Maximized Energy Efficiency
- Construction Waste Management Plan
- Building / Systems Design as Learning Tool
- Storm Water Catchment & Treatment / Rainwater Harvesting
- **45 CHPS points targeted**

Lincoln Middle School

BUDGET STATUS

- | | |
|-------------------------|----------|
| • Current Budget | \$16.0 M |
| • Current Cost Estimate | \$16.3 M |

Reductions to the original scope:

- Reduced number of new standard classrooms from 12 to 8
- Music Building will remain as is

Proposed additional reductions:

- Reduce scope of site work

Lincoln Middle School

FRANKLIN ELEMENTARY SCHOOL

FRANKLIN ELEMENTARY SCHOOL

Original BB Scope

- Remove 6 relocatables along the west alley
- New two-story building with 8 classrooms along with a new library, food service and restrooms
- Expansion of the parking lot along south alley
- Upgrade outdoor eating area
- **Classroom net gain: +2**

Budget: \$7 Million

- Upgrade to the fire and life safety/fire alarms as required
- Upgrade to the technology infrastructure campus-wide

Current BB Scope

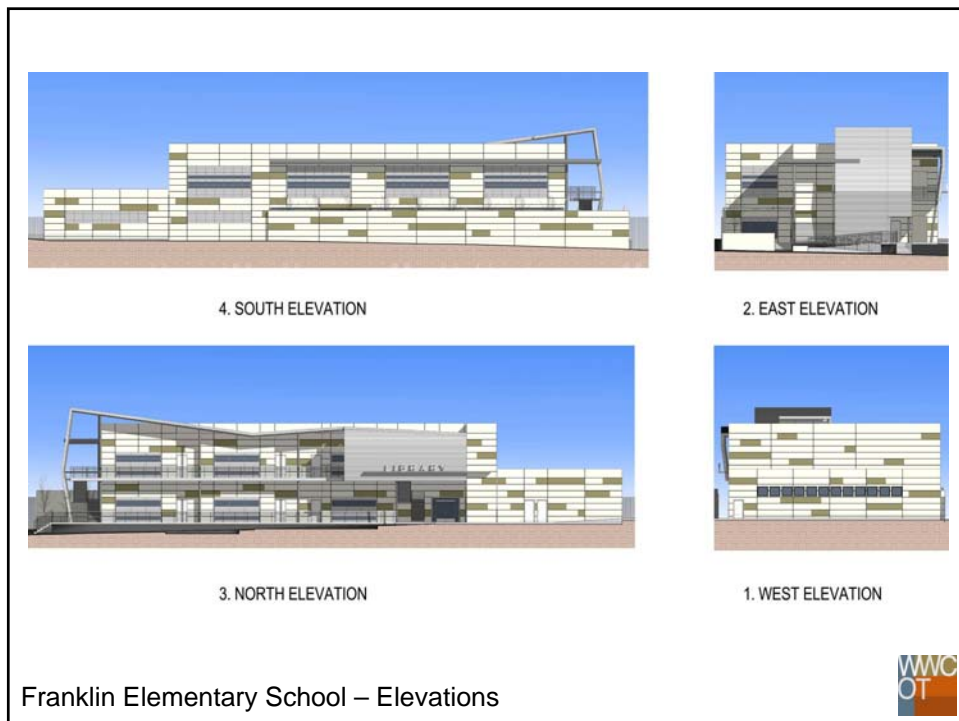

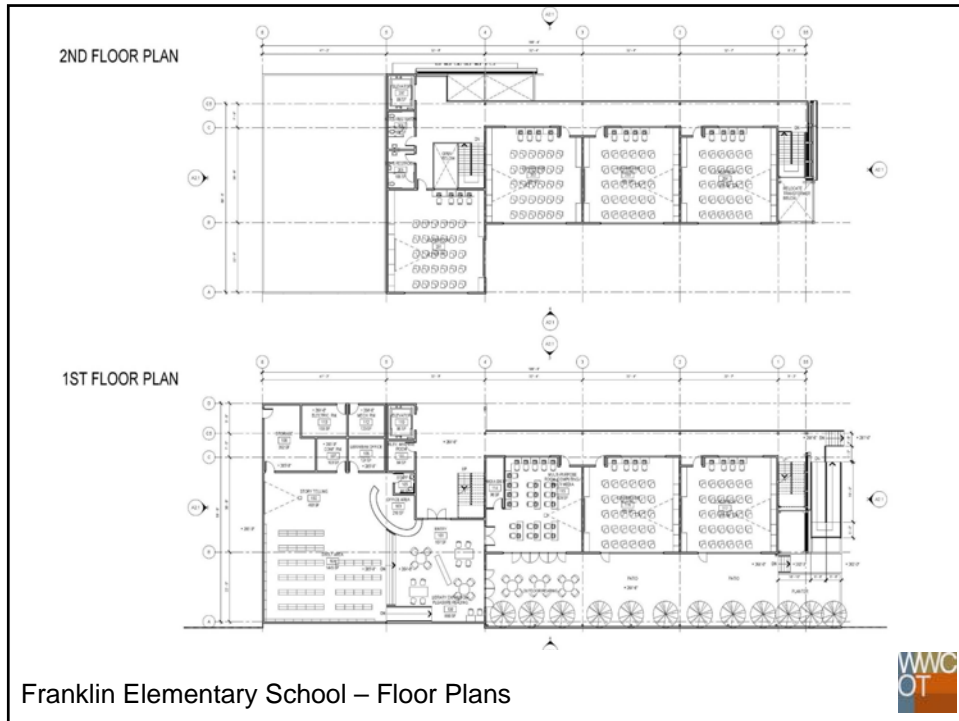

- Remove 6 relocatables along the west alley
- New two-story building with 6 classrooms along with an expanded library
- Renovate existing Library
- **Classroom net gain: 0**

Budget: \$7 Million

- Upgrade to fire and life safety, fire alarms as required
- Upgrade to technology infrastructure campus-wide

MCKINLEY ELEMENTARY SCHOOL

MCKINLEY ELEMENTARY SCHOOL

Original BB Scope

- New two-story classroom building with 16 classrooms
- New parking, site work and fencing adjacent to new buildings as required
- Remove 9 relocatables
- Re-site relocatables as required to provide interim housing
- Incorporate Historic Thematic District considerations / requirements
- Future planning consideration: possible joint-use library and enhanced visual access to historic façade
- **Classroom net gain: +7**

Original Budget: \$7.5 Million

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide

Current BB Scope

- Remove 6 relocatables
- New two-story 8 classroom building New parking, site work and fencing adjacent to new buildings as required
- New Special Day Classroom – Intensive Services Suite
 - 3 classrooms with restrooms & storage
 - OT/PT Clinic 4 New Offices
 - Access to Drop-Off/Pick-up Area
 - Staff Parking
- Incorporate Historic Thematic District considerations / requirements
- Future planning consideration: possible joint-use library and enhanced visual access to historic façade
- Classroom net gain: +5

Current Budget: \$11.5 Million

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide

ROOSEVELT ELEMENTARY SCHOOL

DATA CENTER

Scope:

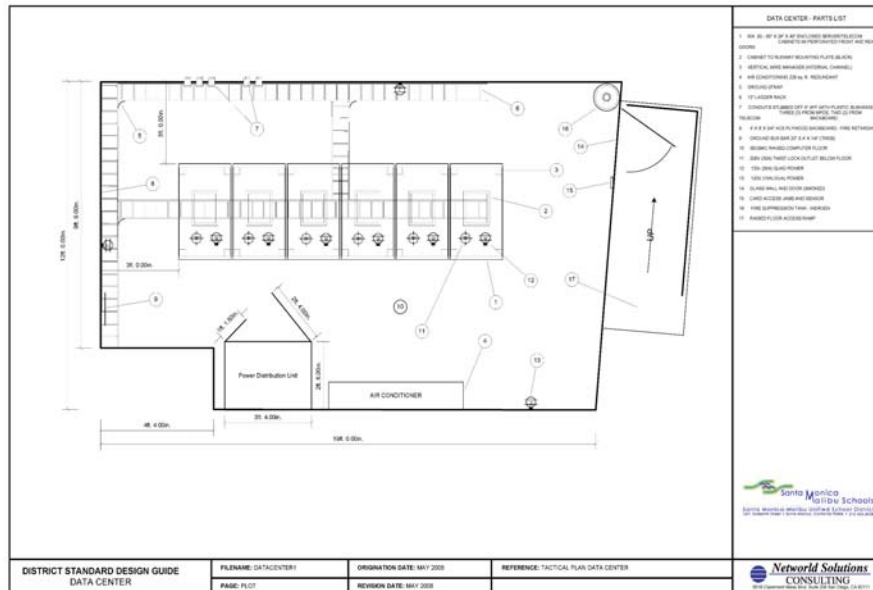

Improve as required to convert existing room at District Offices to an Industry standard Data Center capable of housing computer equipment and required infrastructure, including:

- a. Raised floor
- b. Ramp access from adjacent room
- c. UPS
- d. Air conditioning with redundancy
- e. Structural upgrade to roof, as required
- f. Fire suppression
- g. Glass storefront and door
- h. Card Access

Area: 216 S.F.
Budget: \$1 M

DATA CENTER – PROPOSED PLAN

Grant ES	4	20	Judith Meister
Muir ES/SMASH	3	8	Ted Bardacke
Rogers Learning Community	3	28	Bill Jepson

Original BB scope

1. Demolish 80s blocks and construct new two-story classroom building
2. Replace 10 classrooms w/ 18 new classrooms, including Science Labs
3. Relocate administrative offices to room 16-18 and renovate old administrative offices into 3 classrooms
4. Construct new Commons w/ permanent shade structure
5. Historic Thematic District
6. Consider organization of the campus into three academic houses
7. Address northeast drop-off/pick-up, preschool requirements.
8. Investigate existing design of solar demonstration project sponsored by City of Santa Monica

Budget: \$12 M

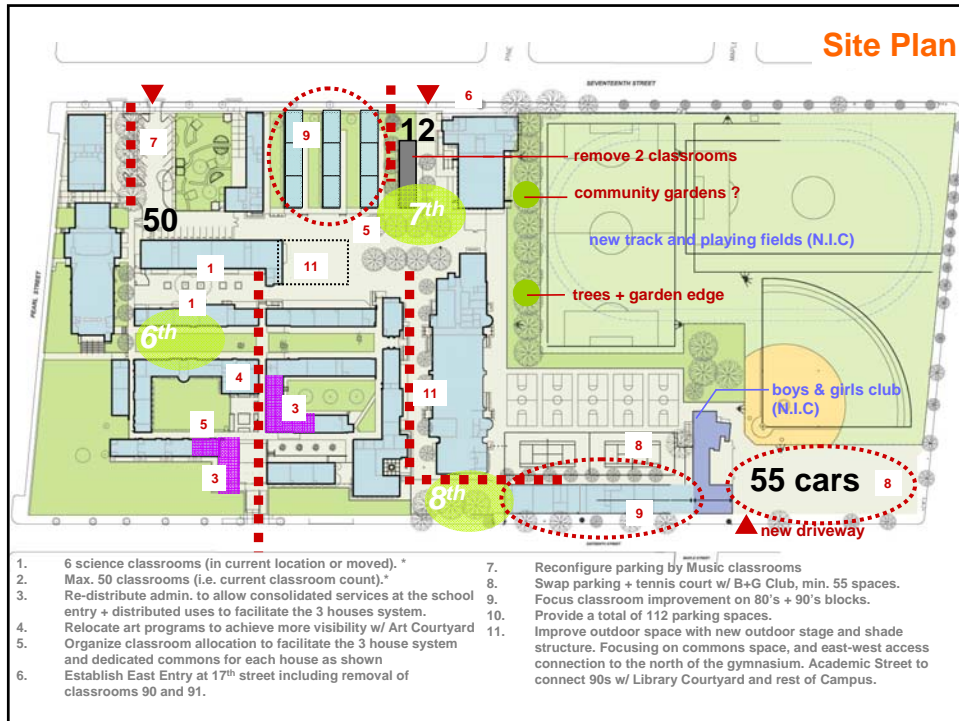

9. Upgrade fire and life safety, fire alarms as required
10. Upgrade technology infrastructure campus-wide

Current BB scope

1. Demolish 80s blocks and build 9 new classrooms in one-story
2. All Science classrooms remain as-is
3. Classroom are organized to facilitate three academic houses w/ associated dedicated commons for each house
4. Add new building (w/ Solar Canopy) and consolidate admin offices to provide secure entry, better functionality and a more welcoming presence
5. Relocate Art Program to heart of campus
6. Provide shading and ventilation to 90s classrooms
7. Construct new Commons w/ permanent shade structures and improve central courtyard to the West
8. Landscape green fringe around new field as funds permit
9. Swap parking + tennis court locations to improve campus safety and spatial connections
10. Address northeast drop-off/pick-up, preschool requirements
11. Establish East entry @ 17th street, including removal of classroom #90 + 91

Budget: \$12 M

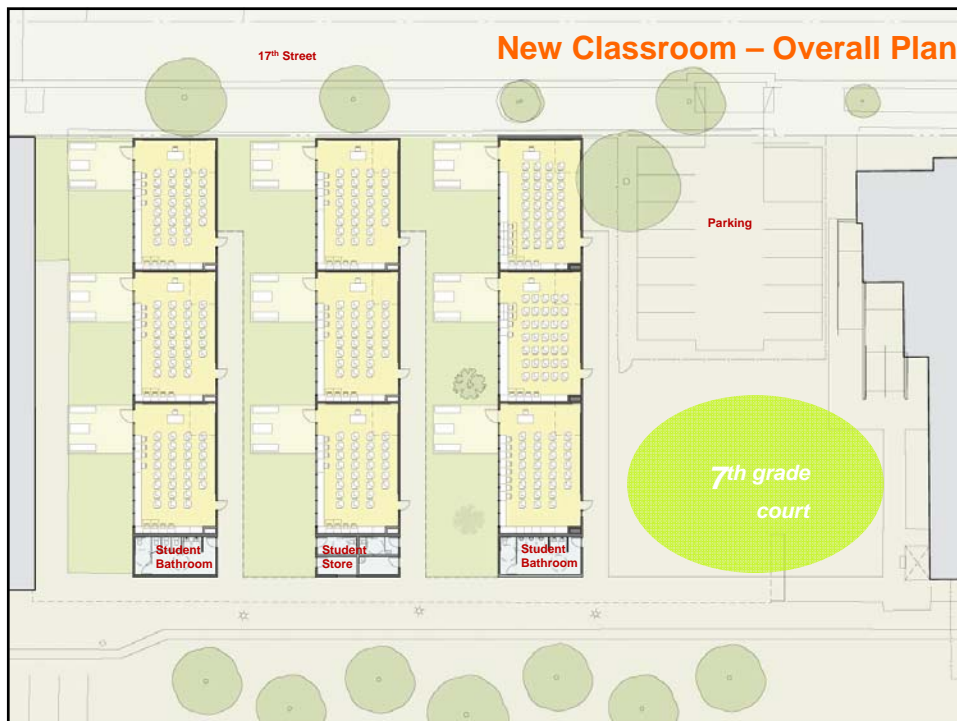

12. Upgrade fire and life safety, fire alarms as required
13. Upgrade technology infrastructure campus-wide

New Attendance Office + Main Office – Main Court

New Classroom – Overall Plan

New Classroom – View from Commons

New Classroom – Section looking north-east

Sustainable Design Approach

Key Features: Opportunities + Best Practices

Campus-wide

- Bicycle Parking
- Low-Emitting Materials
- Joint-use of Park + Recreation Spaces
- Reduce Heat Island w/ Landscaping

New Buildings

- Natural Day-lighting
- View Windows
- Indoor Air Quality, improved by natural ventilation + operable windows
- Acoustics, reduced noise levels by spatial design
- Thermal Comfort, improved by natural ventilation and/or separate thermal controls
- Reduce Heat Island w/ Cool White Roof
- "Solar Chimney System" Design Feature as Educational Demonstration, includes:
 - Solar Heat Collector
 - Passive Stack ventilation
 - Earth tubes air cooling by underground soil temperature differential
 - Nighttime Thermal Flushing
 - Reduced reliance on wind-driven ventilation

New Main Entry

- Photo-Voltaic Solar Canopy to generate on-site renewable energy

New Classrooms

- Adjacent Outdoor Learning Spaces

Potential CHPS points identified : 35 pts

Budget Status

Current Budget **\$12M**

Current Cost Estimate **\$14.9M**

Reductions made to date:

1. Provide 10 new classrooms instead of 18 (net 0 new classrooms)
2. Keep Existing Science Classrooms; no new or additional Science Classrooms
3. Reduce scope of improvements at 90s wing (Bldg A)
4. Existing Science Wing (Bldg L) improvements + upgrades
5. Existing Science Classrooms (Bldg S) improvements + upgrades

Proposed additional reductions:

1. Reduce area of Stage + Shade @ Commons
2. Reduce extent of Landscaping campus-wide
3. Photo-voltaic panels on Entry Canopy

Questions

Original BB scope

-Replace west alley relocatables with new two-story, 10 classroom building

-Re-site relocatables to provide interim housing as required

-Historic Thematic District

BUDGET

\$4.5 Million

-Upgrade fire and life safety, fire alarms as required

-Upgrade technology infrastructure campus-wide

Current BB scope

-Replace west alley relocatables with new one-story, 4 classroom building

-Re-site relocatables to provide interim housing as required

-Address parking and drop-off at southern parking lot

-Secure/beautify front entry

-Library courtyard improvements

-Historic Thematic District

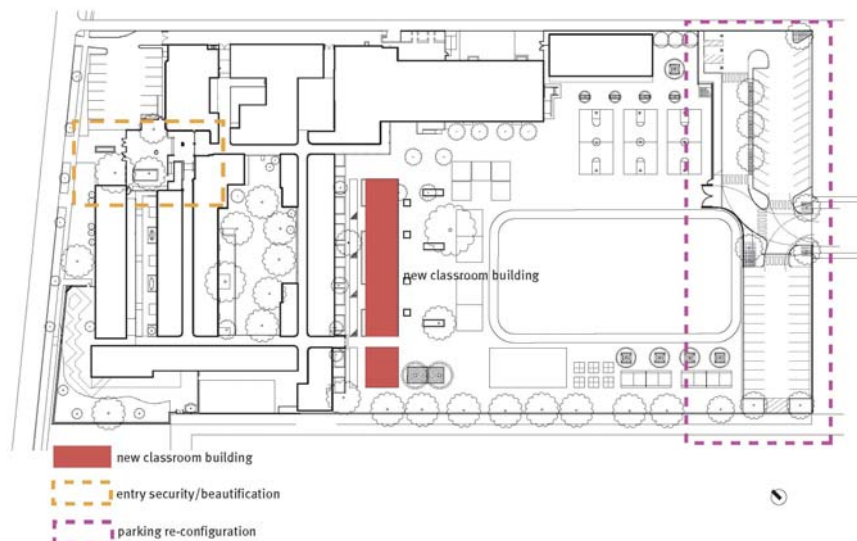

BUDGET

\$4.5 Million

-Upgrade fire and life safety, fire alarms as required

-Upgrade technology infrastructure campus-wide

Site Plan

From the Playground

Sustainable Design Approach

Key Features+Opportunities+Best Practices

Campus-wide

- Minimize storm water run-off
- Efficient irrigation methods
- Low-emitting materials

New Classrooms

- Solar chimney system for natural ventilation
- Natural day-lighting
- Operable windows
- Sustainable education opportunities

Potential CHPS points identified

37

Budget Status

Current Budget **\$4.5 M**

Current Cost Estimate **\$6.2 M**

Reductions made to date:

-New classrooms reduced from 6 to 4

Proposed additional reductions:

-Library courtyard developments

-Minimize playground scope

Questions

Muir Elementary School/SMASH context

Original BB scope

- Remove relocatables along 6th Street
- Two new preschool classrooms with dedicated playground
- Two new kindergarten classrooms with dedicated playground
- Review phasing requirements

BUDGET

\$2.5 Million

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide

Current BB scope

- Remove relocatables along 6th Street
- Two new preschool classrooms with dedicated playground
- Two new kindergarten classrooms with dedicated playground
- Review phasing requirements

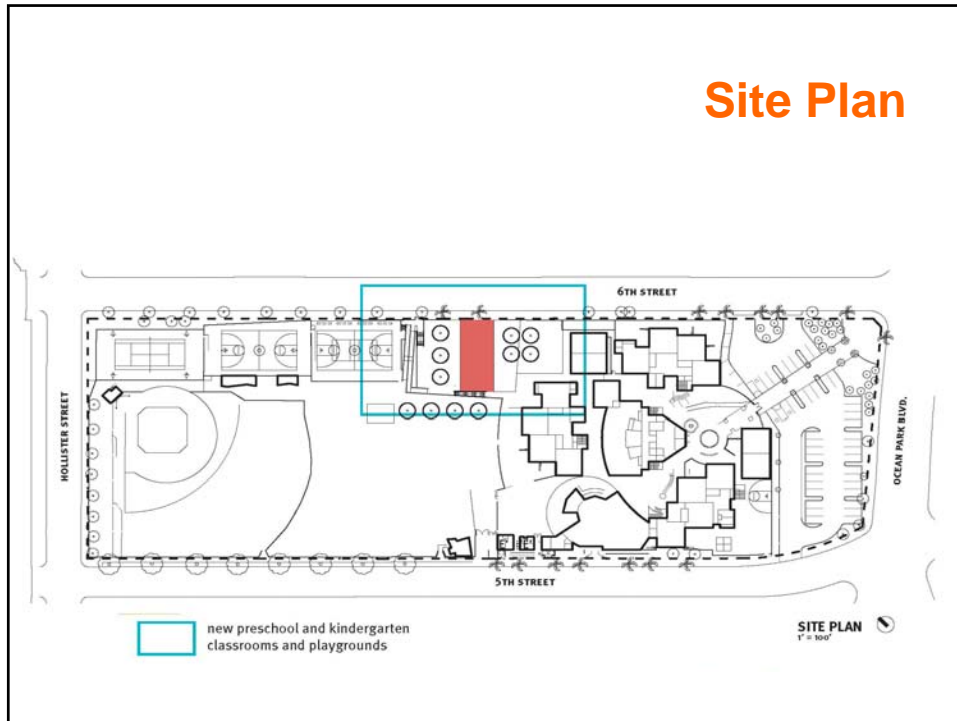

BUDGET

\$2.5 Million

- Upgrade fire and life safety, fire alarms as required
- Upgrade technology infrastructure campus-wide
