**RE: CALIFORNIA HISTORICAL RESOURCES INFORMATION SYSTEM RECORDS SEARCH RESULTS
FOR FRANKLIN ELEMENTARY SCHOOL, CITY OF SANTA MONICA, LOS ANGELES COUNTY,
CALIFORNIA**

Dear Ms. Wu:

On October 8, 2024, Michael Baker International conducted a records search at the South Central Coastal Information Center (SCCIC) for Franklin Elementary School in the City of Santa Monica, California. The records search included the project area and a 0.25-mile radius (see **Attachment 1**). The SCCIC, as part of the California Historical Resources Information System, California State University, Fullerton, an affiliate of the California Office of Historic Preservation (OHP) and the State Historical Resources Commission (SHRC), is the official state repository of cultural resources records and reports for Los Angeles, Ventura, San Bernardino, and Orange Counties. Michael Baker International supplemented this search with available online databases maintained by federal, state, and local governments and repositories. The results of the records search are presented below.

PROJECT AREA

The project area is identified as the boundaries of Franklin Elementary School, located at 2400 Montana Avenue in Santa Monica, Los Angeles County, California. The project area is mapped within the *Beverly Hills, California* USGS 7.5-minute topographic quadrangle map (see **Attachment 1**).

CULTURAL RESOURCES IDENTIFICATION METHODS

On October 8, 2024, Senior Archaeologist Marc Beherec completed a records search of the project area and a 0.25-mile radius at the SCCIC (**Attachment 2**). In addition, the following federal, California, and local inventories were reviewed:

- National Register of Historic Places (NRHP) (National Park Service 2020).
- Built Environment Resources Directory (BERD) for Los Angeles County (OHP 2024a). The directory includes resources reviewed for eligibility for the NRHP and the California Historical Landmarks programs through federal and state environmental compliance laws, and resources nominated under federal and state registration programs, including the NRHP, California Register of Historical Resources (CRHR), California Historical Landmarks, and California Points of Historical Interest. The BERD was consulted only for buildings located within or within 0.25-mile of the project area that face streets surrounding the project area.
- California Historical Resources (OHP 2024b).
- City of Santa Monica Historic Resources Inventory (City of Santa Monica 2018)

Previous Studies

The records search revealed that four cultural resources studies have previously been completed within a 0.25-mile radius of the project area (Table 1). Of these, one study overlapped the project site. However, that study did not include a pedestrian survey of the project site.

Table 1: Previous Studies Within 0.25-Mile of the Project Site

Author	Report No.	Date	Title/Description	Within the Project Area?	Historic Resources Identified within the Project Area?
McKenna, Jeanette A.	LA-06498	2002	Highway Project Involving Upgrading of Intersection Within the City of Santa Monica Located Between San Vicente Blvd. (north; Ocean Park (south); 9th Street (west); and 30th Street (east)	No	No
Bonner, Wayne H.	LA-10295	2009	Cultural Resources Records Search and Site Visit Results for T-Mobile USA Candidate SV11247B (Alta Ave ROW), 2235 Alta Ave., Santa Monica, Los Angeles County, CA.	No	No
Unknown	LA-11005	2010	Westside Subway Extension Historic Property Survey Report and Cultural Resources Technical Report	No	No
Foster, John M.	LA-11114	2011	Archaeological Investigation, Partial Inventory Secondary Sewer Renewal Program Bundy and San Vicente Project	Yes	No

Resource Results

The SCCIC records search identified two cultural resources within 0.25-mile of the project area (Table 2). Both of these resources are located within the project site, and both are historic in age. Resource P-19-188701 is the Santa Monica Public Schools Thematic District. Resource P-19-188713 is Franklin School. Department of Parks and Recreation 523-series forms for the two resources are included in Attachment 2.

No archaeological sites are documented within the project area or a 0.25-mile radius.

Table 2: Documented Resources Within 0.25-Mile of the Project Site

Primary Number	Trinomial	Description	Evaluation / OHP Status Code	Distance from Project Site
P-19-188708	None	Santa Monica Public Schools Thematic District	5D3: Appears to be a contributor to a multi-component resource that appears eligible for local listing or designation.	Within
P-19-188713	None	Franklin School	5D3: Appears to be a contributor to a multi-component resource that appears eligible for local listing or designation.	Within

Please do not hesitate to contact me with any questions.

Sincerely,

Marc Beherec, PhD, RPA
Senior Archaeologist

6. Property category District If district, number of documented resources 6
7. Briefly describe the present physical appearance of the property, including condition, boundaries, related features, surroundings, and (if appropriate) architectural style.

The Santa Monica Public Schools Thematic District contains six schools city-wide which retain their historic appearance: McKinley School (2401 Santa Monica Boulevard), Franklin School (2400 Montana Avenue), Madison School (1018 Arizona Avenue), Roosevelt School (801 Montana Avenue), John Adams Junior High School (2355-2417 17th Street), and Grant School (2400 Pearl Street). Five of the campuses reflect the influence of the PWA Moderne style which was popular in the years following the 1933 earthquake when they were either constructed or rebuilt. The sixth, McKinley, although rehabilitated following the earthquake, retains its original Spanish Colonial Revival styling. All of the schools have been altered to some degree since the late 1930s, many having received additional buildings in 1940 and 1948. These six schools were identified as contributors to the thematic district based on their overall integrity. However, individual features of other campuses, including the stadium and bleachers at Santa Monica City College (Marsh, Smith and Powell, 1947), the open air theater at Santa Monica High School (1921), and the additions to Lincoln School (Parkinson, 1936) which may be intact could be added to the district.

The Santa Monica School District has historically been one of the most important aspects of life in Santa Monica. Almost as old as the town itself, the district was established in 1875 within months of the recording of the subdivision of Santa Monica and the first sale of lots for homesites. In 1876 the first school building to be erected in the young community opened at 6th Street and Arizona on land donated by the town founders, Senator John P. Jones and Colonel Robert S. Baker. Additional schools were built in the 1890s in South Santa Monica (Ocean Park) and in Santa Monica Canyon. Beginning with the construction of Lincoln High School at 10th and Arizona in 1897, a school building boom ensued, resulting in eight new schools in eighteen years. A high point of this activity, which mirrored the growth in residential construction, was the building of Santa Monica High School in 1912.

In 1933, the Long Beach earthquake substantially damaged all of the school buildings in Santa Monica as elsewhere in the region. As a result, the Santa Monica schools were

HISTORIC RESOURCES INVENTORY

Continuation Sheet: Santa Monica Public Schools

Significance:

closed, and classes were held in tents. Between 1934 and 1938, schools were rebuilt, meeting the earthquake safety standards mandated by the Field Act. Most of the reconstructive activity was accomplished with the assistance of the Works Progress Administration, supplemented by local funds. Santa Monica's historic schools thus mirror the architectural fashions of the mid and late 1930s, when architects were shedding traditional styles in favor of the stripped streamlining of the PWA Moderne. This stylistic trend links the schools from the period as well as the practice of facilitating access to the outdoors through individual entrances into classrooms, outdoor corridors, and interior courtyards.

The architects chosen to design the schools were amongst the best in the area. In the 1920s, Francis D. Rutherford of Santa Monica and Allison and Allison of Los Angeles provided the District with designs for Franklin, Madison and McKinley Schools. The reconstruction utilized the services of the premier school architects of the day, Marsh, Smith and Powell, and Parkinson and Parkinson, one of the leaders in architecture in Los Angeles. Subsequently, the District employed Joseph Estep, associate of Donald Parkinson in the design of the Santa Monica City Hall, and H. L. Gogerty for additions to some of the campuses.

These six schools represent the historic character of school design in Santa Monica. Each has been a focal point of their respective neighborhoods since the late 1930s or earlier. All have associations with architects of note as well as with thousands of past and present residents. The thematic district recognizes these contributions to the City.

7. Briefly describe the present physical appearance of the property, including condition, boundaries, related features, surroundings, and (if appropriate) architectural style.

Franklin School is a complex of one and two story buildings located on a large parcel on Montana Avenue between 23rd and 25th Streets. In style, the school is a blend of the late Moderne with the early Modern. Stucco sheathes the exteriors of the flat-roofed buildings. The main, two story building juxtaposes the horizontal lines of the parapet fascia, lintel and sill courses with the vertical stacks of four and five top-hinged windows arranged in clusters of six. A rounded canopy with modern letters spelling "Franklin School" attached to the wall above it marks the location of the glazed entry. One story classroom buildings contain rooms with large panels of windows and individual doors to the exterior. Although the building permit file contains no reference to the demolition of the 1924 school first built on the site, the current appearance of the school appears to date from post 1933 construction, either to the improvements or to the substantial additions made to the campus in 1948.

SIGNIFICANCE AND EVALUATION

18. Context for evaluation: Theme Institutions Area Santa Monica
 Period 1875-1943 Property type Schools Context formally developed? No
19. Briefly discuss the property's importance within the context. Use historical and architectural analysis as appropriate. Compare with similar properties.

Franklin School is significant for its architectural associations and for its contribution to a thematic district of historic public schools in Santa Monica. It was originally built in 1924 to a design provided by Francis D. Rutherford. Originally from Salt Lake City where his practice included several school buildings, Rutherford came to Santa Monica in the early 1920s and received commissions from the Santa Monica School District for Franklin and Roosevelt Schools. His design for Franklin specified a brick exterior with a tile roof. Additions were made to the school by Rutherford in 1929 and 1930. Like other schools in Santa Monica, Franklin was badly damaged by the 1933 Long Beach earthquake. The school was closed and building permits document the construction of tents for school activities late in 1933 and in 1934. According to James Lunsford in Looking at Santa Monica (page 64), the school was improved by the WPA in 1937. However, permits for several buildings, including a kindergarten, library, "cafetorium," and classrooms, in 1948 seem to indicate the definitive period of construction. Architect H. L. Gogerty, whose reputation rested on several buildings in Hollywood and the Glendale Air Terminal, provided the designs.

CONTINUATION SHEET

Page 1 of 1

Resource Name or #: Franklin School

Recorded by: Jones & Stokes

Date: December 2007

☐ Continuation ☒ Update

Address on Inventory: 2400 Montana Ave

Legal Address (Tax Assessor): 2400 Montana Ave, Santa Monica, CA

APN: 4277002901

Property Name: Franklin School

Description: The property contains a school. It was designed in the Late Moderne style. The resource is recorded in the Historic Resources Inventory with a prior evaluation of 5D3 - Phase 3. Also qualifies under local criterion A.1. Altered windows. This property represents a good example of the Late Moderne architectural style as applied to a school building. As a result, it continues to appear eligible for local listing as a contributor to the "Santa Monica Public Schools District."

Alterations: Changes have been made to the property since it was last evaluated. The windows have been altered.

Updated Status Code: 5D3

Historic District(s): Santa Monica Public Schools

Evaluation: The survey evaluated the resource on the property as falling under criterion A.4 - The property embodies distinguishing architectural characteristics valuable to a study of a period, style, method of construction, or the use of indigenous materials or craftsmanship, or is a unique or rare example of an architectural design, detail or historical type valuable to such a study.
